
Grooming the Hairball - How to Tidy up Network Visualizations?

Hans-Jörg Schulz¹, Christophe Hurter²

VIS Tutorial 2013

Universität
Rostock

1. University of Rostock, Rostock, Germany
2. French Civil Aviation University, ENAC, Toulouse, France

INTRODUCTION

Speakers: Hans-Jörg Schulz & Christophe Hurter

About the Speakers: Hans-Jörg Schulz

- PhD in 2010 @ Rostock
- Thesis on Graph Visualization
- Now PostDoc @ Rostock
- Fields of Research:
 - Design Spaces
 - Vis. of Heterogeneous Data
 - Vis. for the Life Sciences
 - Graph & Tree Visualization

About the Speakers: Christophe Hurter

- PhD in 2010 @ University of Toulouse
- Thesis on Multivariate data exploration
- Now Assistant Professor @ ENAC, French Civil Aviation University
- Fields of Research:
 - Multivariate data exploration
 - GP-GPU techniques
 - Information visualization
 - Trajectory exploration

About the Tutorial Topic

Node-link diagrams for network data

- often attributed to Moreno for depicting social networks

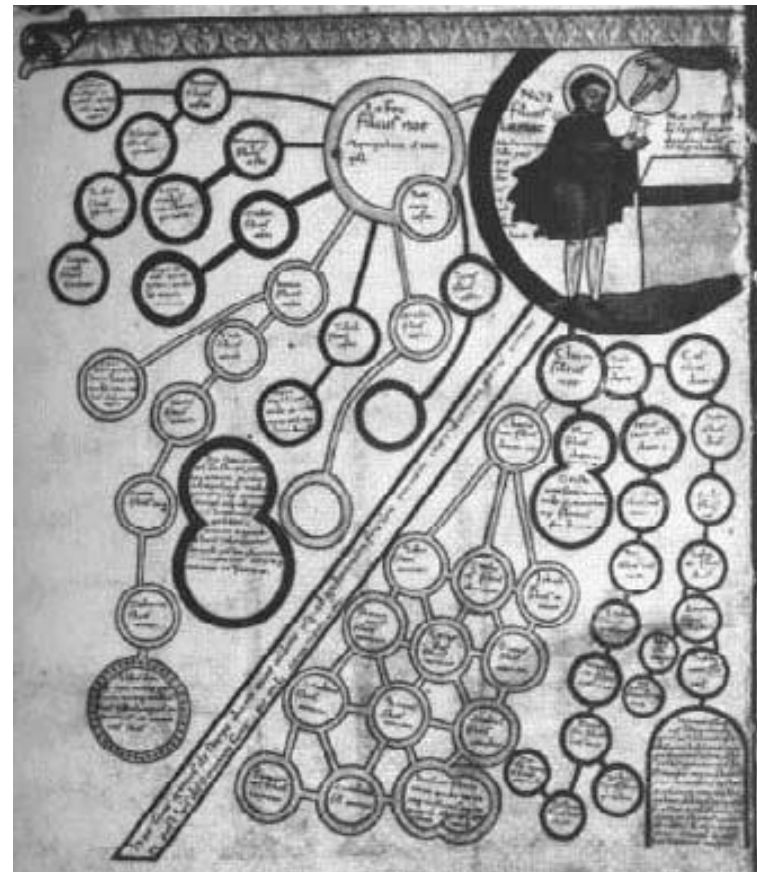

[source: Freeman 2000]

About the Tutorial Topic

Node-link diagrams for network data

- often attributed to Moreno for depicting social networks
- but instances of earlier examples exist (e.g., family trees) that go back as far as the 13th century
- (obviously) still hand-drawn back then

[source: Kruja et al. 2001]

About the Tutorial Topic

Node-link diagrams for network data

- often attributed to Moreno for depicting social networks
- but instances of earlier examples exist (e.g., family trees) that go back as far as the 13th century
- (obviously) still hand-drawn back then
- first automated layout routines appeared in the 1960's – e.g., [Tutte 1963]

[source: Eades+Hong 2012]

About the Tutorial Topic

Classifications of Node-link diagrams

- By degrees of freedom of the nodes

[adapted from: Schulz+Schumann 2006]

About the Tutorial Topic

Classifications of Node-link diagrams

- By degrees of freedom of the edges

[adapted from: Gansner 2013, Dagstuhl talk]

About the Tutorial Topic

But, Node-Link-Layouts usually don't scale!

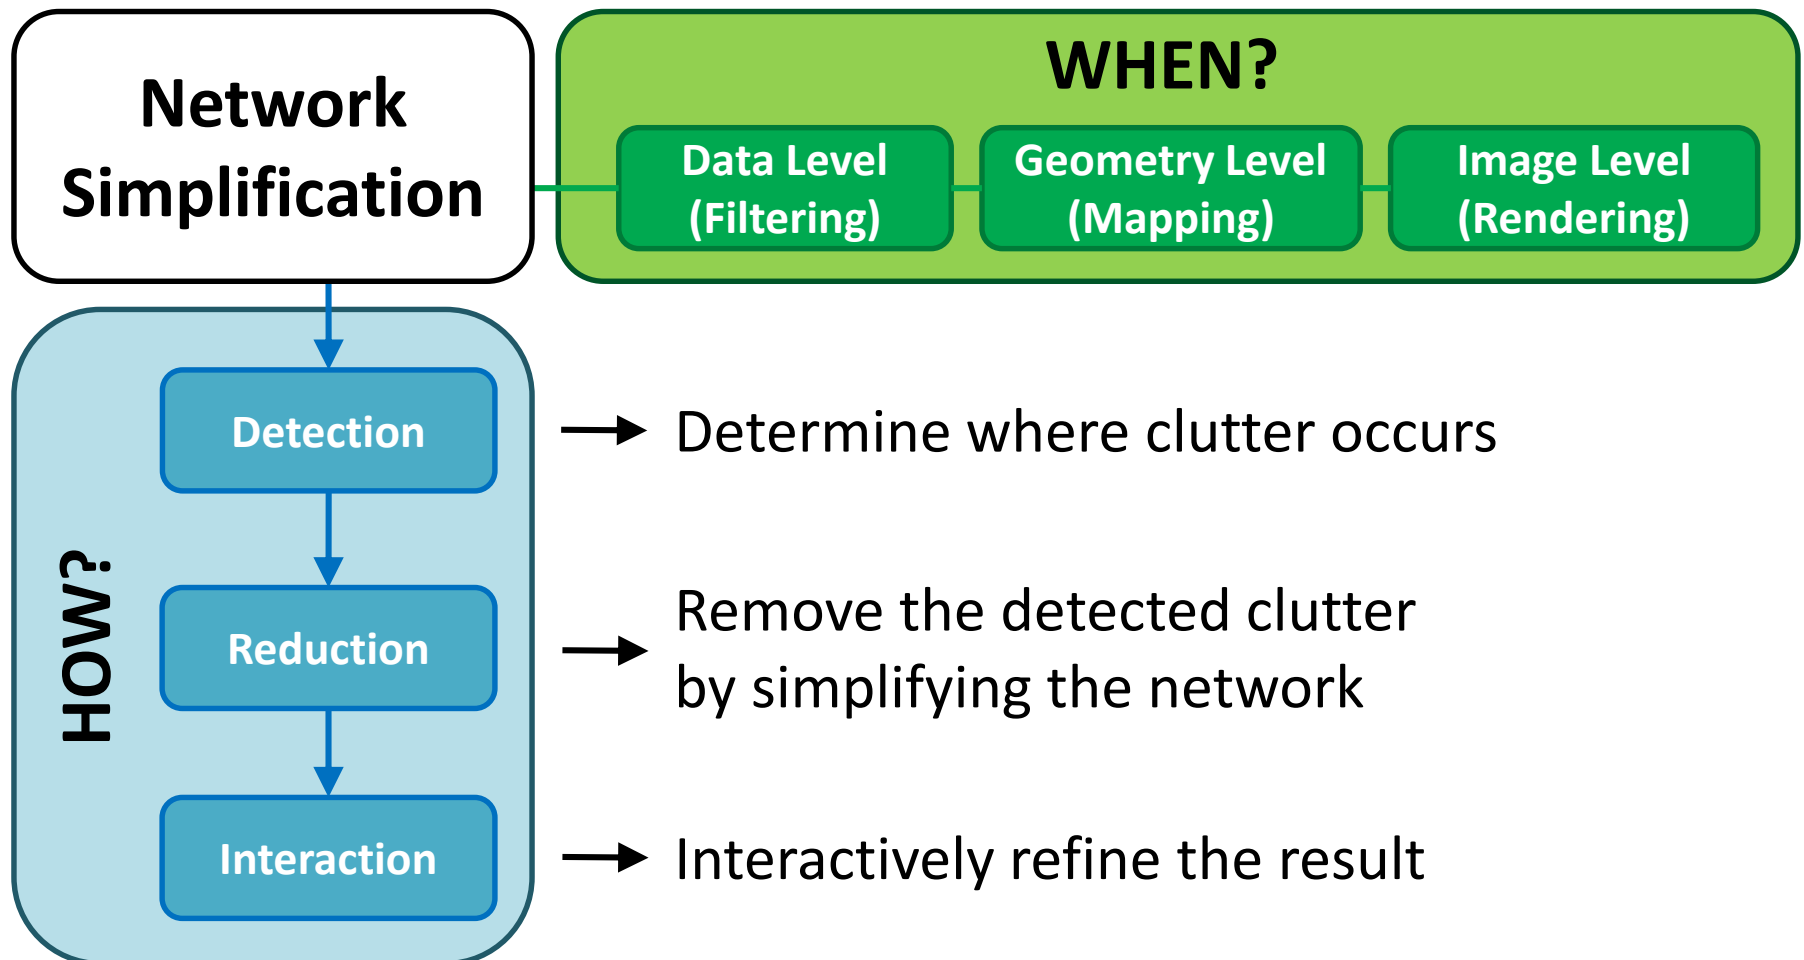

Blog network visualized with Gephi

About the Tutorial Structure

Tentative Schedule:

0. Introduction (you're listening to it right now)
8:30-8:45 (\approx 20 minutes)
1. Node Set Simplification
8:45-10:00 (\approx 70 minutes)
2. Edge Set Simplification
10:00-10:10 (\approx 10 minutes)
10:10-10:30 coffee break
10:30-11:35 (\approx 65 minutes)
3. Applications & Open Research Questions
11:35-12:10 (\approx 35 minutes)

About the Tutorial Structure

If you have remarks or questions please feel free to ask them on the spot!
